1 Description

The product life cycle is the process a product goes through from when it is first introduced into the market until it declines or is removed from the market.

Kanardia product life cycle includes the following three phases:

- **Active sales** - typically the first 5-10 years. Product features and SW packages are stable, maintained and enriched with additional functions. Products are available for order, shipped in volume, and benefit from SW packages developed.
- **Mature phase** - it lasts for at least 8 years following the last sale of the product.
 - Full SW support: first 3 years after the last sale we guarantee complete SW support.
 - Bug support/Spare parts: 3-8 years after the last sale we guarantee SW bug support and still offer spare parts service.

This represents the minimum guarantee, but can extend longer.

- **End-of-life phase** - it starts 8 years after the last sale. Once this phase is reached, we cannot guarantee SW support or spare parts service anymore.

2 Life Cycle Status

This section reveals life cycle status of Kanardia products at the time of writing. They are organised in tables, which columns have the following meaning:

1. Intro year

- This is the year the product was first launched.

2. Active/Last sale

- If ✓ is in the column it means the product is still in *Active sales* phase.
- If year (e.g. 2012) is in the column, it means the last product was sold that year and *Active sales* phase ended.

3. Full SW Support

- If ✓ is in the column it means, we still guarantee complete SW support for the product.

- If year (e.g. 2012) is in the column, it means complete SW support ended that year.

4. EOL

- The End Of Life (EOL) year starts 8 years after the last product was sold.
- In this phase we cannot longer guarantee bug SW support and spare parts service.
- Availability of spare parts may be longer. This depends on spare parts availability on the market.
- When this is possible, we continue to offer support to customers even if their product has reached its EOL phase.
